

BULK MILK COOLER (BMC)

A **milk cooling tank**, also known as a bulk tank or milk cooler, consists of an inner and an outer tank, both made of high-quality stainless steel. The space between the outer tank and the inner tank is isolated with polyurethane foam.

Infinite Milk Cooling Tanks are the best solution for cooling milk. Infinite bulk milk cooling tanks are equipped with agitator and a state of art refrigeration system. The refrigeration system is built to the specific requirement with hermetically sealed compressor, controls and safety features, which makes the bulk coolers extremely reliable and energy efficient.

Technical Features: -

- Capacities ranging from 500 L to 5000 L
- Energy efficient Solution
- Minimum Space required
- Digital temperature control

Advantages: -

- High Standard of Milk Hygiene.
- Compact design for flexible relocation.
- Customized service and maintenance agreements.

Options: -

- Customized Size & Design
- With or without Milk collection System

Application: -

- Raw Milk Storage

Model	Capacity	Construction Type	Length Mm	Width Mm	Height Mm
INFINITE-BMC0.5	500 L	Vertical Cylindrical	1200	1500	1250
INFINITE-BMC01	1000 L	Horizontal semi-Cylindrical	1800	1250	950
INFINITE-BMC02	2000 L	Horizontal semi-Cylindrical	2500	1600	950
INFINITE-BMC03	3000 L	Horizontal Cylindrical	2250	1800	1800
INFINITE-BMC05	5000 L	Horizontal Cylindrical	2000	2100	2100
